

Accept payments with Recurrente

A 5-minute setup guide for your hotel · Guatemala (GTQ)

Anfigo sends your guests a secure link to pay or guarantee their booking. Payments are processed by **Recurrente** on their own secure page — Anfigo never sees or stores card numbers. You only need to connect your Recurrente account once.

You'll need A Recurrente account · ~5 minutes

IN YOUR RECURRENTe ACCOUNT

1 Copy your Secret Key

Log in to Recurrente → **Configuración** → **API**.

Copy the **Secret Key** (starts with `sk_live_`). Keep it private — it's like a password for your account.

2 Create a webhook

In Recurrente → **Webhooks**, create a new webhook.

- For the URL, paste the **Webhook URL** shown on Anfigo's Payment page (use the *Copy* button next to it).
- After saving, copy the webhook's **signing secret** (starts with `whsec_`). This lets Anfigo confirm payment notifications are genuine.

IN YOUR ANFIGO DASHBOARD

3 Connect Recurrente

Go to **Advanced** → **Payment**.

- Provider: **Recurrente** · Currency: **GTQ**
- Paste your **Secret Key** and **Webhook Signing Secret**.
- Click **Test** — you should see ✓ **Connection OK**.

4 Set your policies

Fill in the rules that match how your hotel works:

- **Payment timing & deposit** — when to charge and how much (full amount, a % deposit, or a fixed deposit).
- **Cancellation & refund** — your free-cancellation window and refund text.
- **No-show policy** — what is charged when a guest doesn't arrive.
- **Taxes & fees** — tax %, tourism/city fee, cleaning fee.

5 Enable & save

Tick **Enable payment links**, then click **Save**. You're done.

YOUR SECURITY

Card details never touch Anfigo. Guests enter their card only on Recurrente's secure, PCI-compliant page. Anfigo only sends the link and receives a "paid" confirmation — no card number, expiry, or CVV is ever stored or shown in Anfigo. Your API keys are stored privately and shown masked in the dashboard.

Need help? Contact Anfigo support. · Recurrente API keys: Recurrente → Configuración → API. · This guide reflects the current Anfigo Payment setup.
